## 2021 RIESLING ICEWINE

A true Canadian treasure, Icewine can only be produced when the temperatures plunge below - 8°C (17.6°F) and the grapes naturally freeze on the vine. The resulting juice is lusciously sweet and balanced, with the vibrant acidity that British Columbia wines are known for.

### WINEMAKING

Our small-lot production of Icewine was hand harvested overnight at -11°C on December 17th, 2021 at 44.7 Brix. Naturally frozen whole-clusters were pressed over a 14-hour period prior to being fermented in stainless steel for six weeks.

### TASTING NOTES

This decadent, full-bodied wine opens with vibrant aromas of peach, apricot and honeydew followed by rich flavours of marmalade and peach on the palate.

### PERFECT PAIRINGS

Serve chilled with fruit tarts, cheesecake, crème brûlée or a salty blue cheese.

**Alc. by volume:** 12%

**Total acidity:** 10 g/l

**Residual sugar:** 169 g/l

**pH:** 3.41
